

Environmental Impact Statement stakeholder engagement

Both ocean and land-based studies will be undertaken to evaluate the most appropriate tailings management option for the Wafi-Golpu Project. These options will also be subject to community consultation and the evaluation and feedback will be documented in the Environmental Impact Statement for the Government’s further consideration.

Stakeholder engagement

- The project is committed to establishing an ongoing relationship with communities and stakeholders.
- Public roadshows will be held in communities both prior to and following the submission of both the Environmental Inception Report and Environmental Impact Statement. These roadshows will present the results of environmental and social investigations and invite community feedback and input.
- Any changes to the project description will be communicated to stakeholders through WGJV Community Affairs and Lands staff.

Questions?

If you have a question or want to show your support:

- Tell our Community Affairs people.
- Write a letter to Community Affairs.
- Use the WGJV grievance mechanism (if you have a particular concern).

We will include your questions on a database and follow up with you.

If you would like further information from WGJV about the Project please contact:

Mr David Masani

Manager – Community Affairs and Lands, Wafi-Golpu Joint Venture, Lae
